

CAMPAIGN

Nordic Edge pave the way for Green IT with two-factor authentication

Does your company use hardware tokens for login?

We help you to appreciably reduce the cost of managing security tokens and at the same time you are contributing to a better environment!

The solution is Nordic Edge™ One Time Password Server

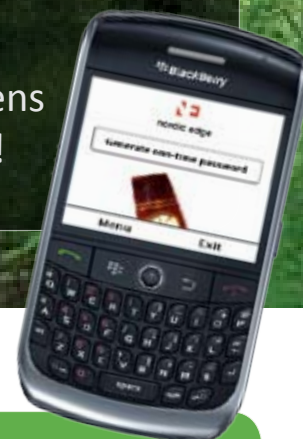

Nordic Edge™ One Time Password Server supports various authentication methods including SMS, E-mail, Instant Messaging, Pre-fetched codes and Pledge – Nordic Edge's software client that turns your phone into a security token. Upgrading to Nordic Edge™ One Time Password Server not only save you money, it also means that you are contributing to a healthier planet.

Campaign

For a limited time we are buying your old tokens when you upgrade to One Time Password Server from Nordic Edge. Offer is valid for order placed no later than March 31st 2010.

Nordic Edge's environmental policy ensures that the battery and all other parts in the token are properly recycled.

For more information and ordering, please contact us at email: sales@nordicedge.se or by phone +46 8 122 07 500

Supporting authentication with One Time Passwords:

- Sent via SMS
- Sent via E-mail
- Sent via Instant Messaging
- Pre-fetched codes
- Generated on mobile phone (Pledge)
